Run Instructions for "Miracle of Luck"

1. **Visual Studio Code (VSC):**
   Install Visual Studio Code from the official website: https://code.visualstudio.com/.
2. **Node.js and npm:**
   Install Node.js and npm from the official website: https://nodejs.org/.
   Ensure that Node.js and npm are added to your system's PATH.
3. **Clone the Repository:**
   Download or clone the "Miracle of Luck" project repository from GitHub:
   https://github.com/Danilov210/Proj2.
   This repository contains both the client and server code for the project.
4. **Install Dependencies:**
   - **Client:**
     - Open a terminal and navigate to the client directory: `cd client`.
     - Run the command: `npm install` to install client-side dependencies.
   - **Server:**
     - Open a terminal and navigate to the server directory: `cd server`.
     - Run the command: `npm install` to install server-side dependencies.
5. **Start the Server:**
   - Open a terminal and navigate to the server directory: `cd server`.
   - Run the command: `npm run start` to start the server.
6. **Start the Client:**
   - Open a new terminal window or tab.
   - Navigate to the client directory: `cd client`.
   - Run the command: `npm run dev` to start the client.
7. **Access the Application:**
   Open a web browser and navigate to https://miracle-of-luck.vercel.app to access the application.
